We have the details of the Vanderbills' news The outrages in the Gulf still occupy public attention in England. The cruption of Vesavius oc curred on the 27th and 28th of May. Prince Albert is said to have made over his hereditary right to the Duchy to his second son. The Vanderbill reports the weather as favorable for the successful laying of the telegraph cable. A correspondent of the N. Y. Tribune states

that despatches from England, in relation to the Gulf outrages, have been received at Washington, and that they do not come up to the expectations of the Administration. Cancent, the murderer, was convicted in New

Sr. Chain Flars Appropriation.—It will be remembered that Seaster Chandler, seizing a favorable opportunity, caused an amendment to be inserted in the miscellaneous appropriation bill, appropriating \$34,000 for completing the improvement of the St. Chir Flats. There is no intimation in subsequent proceedings that the item was stricken out, and we are therefore bound to believe that it is now a law. The amount, added to the former unexpended appropriation, is enough to complete this great work. All hener to Senator Chandler. Let the West rejoice.

The Depere Conspiracy---Hurning of the American Mouse.

On Thursday night last, the American Hotel at Dopero, a fine, large building, was burned to the ground. At the same time an adjacent store, just across the street, was discovered to be on fire, but was saved. The hotel was occubied by a faully consisting of a man, wife and three children, besides two lodgers—all sleeping, but fortunately awakened in time to save them selves. The fire occurred between 1 and 2 o'clock, and by a happy retribution, the flames had not yet died away, when the two prisoners who actually did the firing, and two others who were said to be implicated, were discovered and lodged in juil. It was a credit to Shoriff White, to Mr. Hobbs who gave the carllest information and to all the clipsons in Deperc, who interested thomselves in bringing the gullty to justice .-

The Advecate gives many particulars of this black affair, for which we have neither time nor space. The numes of the prisoners are Ocyden Dyer, a "nice young man" of twenty; Kompton & Whitesides, of the spoke and hub factory; & Whitesides, of the spoke and hub factory; and Charley Whitehouse, "an unpreposeesing fellow, poorly clad, looks as it he had been starved all winter, and evidently has some courage and desperation." "Cordy" turned State's ovidence, told some interesting stories of a certain "Club" gang (probably for the "marines")—but appears to have made a clean breast of the sonspirancy. Justice T. Chas. Morgan held the the four prisoners for trial—there being no District Attorney to protect Dyer as a witness for the State.—Appleton Crescent, June 17.

REPORTED DEATH OF THE EMPEROR OF CHINA -The N. Y. Christian Advocate, of the 18th publishes the following intelligence, from a gen tlemus whom we suppose to be an American missionary in China: Fur Chau, China, March 22, 1858. "It is currently reported that the Emperor is

dead. The Russian embassy received letters from Pekin, dated on last Obrisimas day, stating that the Emperor thee was very sick; that his lower limbs were entirely paralyzed, and that he could not live much longer. The Euglish ambas sy received news via Cauton, from Pekin, dated in February, 1886, to the cheut that the Emperor is dead. This report, however, is not credited here. The report of the Emperor's dangerou illness seems to be well authenticated ; and it ! highly probable his death may soon add a fresh complication to the present negotiations, and furnish another link to the chain of great events by which God is opening up this mighty empire to the Gospel of Mis Son.

These pillare, it seems, were not near strong enough to sustain the tremendous weight of goods, to store away in a tyhologale catablishment like this .-They might have been sufficiently strong in a common store, but even for that purpose, they were inscoure for want of proper caps .warm; but it is just what we need at present to These caps, it was tostified to, should have been strong cak planks, firmly imbedded in the mortar on the tops of the pillars, upon which the timbers supporting the flour should then, have been laid; but instead of this, imperiect caps were placed on some of the pillars, and the timbors were laid on the bare bricks, it appears, upon others. The consequence of this was, that when the great weight of the upper stories alled with heavy goods, came upon the pillars, they began to spilt, not being properly capped, and finally were crushed to pieces by the great weight, and thus taking the principal supporters from under the upper stories; the other timbers soon gave way, when the whole upper part came down, bringing the walls along with it. Mr. BRYANT, another old builder, gave it as his opinion that the fall of the building was caused by the centre support in the interior giving away. Bt. John B, Sanbern, Eq.
Dear Sir:—In reply to your request, asking my opinion with regard to the Composition Roosing patented by C.
Milks, I have to take that I have examined the matter cavefully, having watched its application in various places and in some very difficult ones, which it has been impossible to stop the leakage of with any other known compound. I have no healtsten in proconneity, so far as in Water Proof qualities are concerved, e-seminally the thing, and as to its Fire Proof qualities, having examined the roofs of Homer Ramedell, Fag. I find the roof to Homer Ramedell, Fag. I she the composition remains entirely entosched by the fire, athough containing sourced with falling brands and clusters. I therefore consider it essentially both a Fire and Water Proof substance, and having had considerable experience with other Compositions for Roosing purposes, (particularly with West's patents) I have no hesistation in proconceing it the very best thing extend both as a Fire and Water Proof Composition for Roosing purposes.

MONDAY MORNING, JUNE 21.

The Debatts of Congress. A publication of the very first interest to the people of the United States is now going through the proces. It is Col. BESTON'S AUGINGUMENT OF THE DEDATES OF COMBRES, from 1789 to 1856; compiled from Gales and Scaton's access of Congross, from their Register of Debates, and from is published by D. Averaton & Co., Nos. 346, 348 Broadway, New York, and will be completed in 15 volumes, of 750 pages each. Of this number seven have already becom issued, and the remaining volumes will epsedly follow. They are printed on good sized type and fair white paper, and are substantially bound in cloth, half calf, or law binding, as the purchaser may prefer. The

price of each volume, bound in cloth, is \$3,00. We are indebted to S. C. Garcos & Co., 89 and 41 Lake street, Chicago, who are the publishers of this luvaluable work, for the Biatea of Illinois and Wisconsio, for specimen copies, and we propose to say a few words about each volame, commencing with number one. This opens March 4 , 1769, with the first Congress, first session, held at the city of New York, till September 29, 1789, Ground Washington being the President of the United State. During the first five years of the existence of the Federal Government, the Senate sat habitually with closed doors, so that no records remain of the early debates in that body, but the Journals fully report their proceedings, and these are faithtranscribe the record of the first day in the United States Sonato:

WEDNESDAY, March 4th, 1789. This being the d'y for the meeting of the new Congress, the following members of the Senste appeared and took their seats:

From New Hampshire—John Lamodon and

PAINE WINGATE. From Musenchusetts—Caled Strong. From Connecticut—William L. Johnston and OLIVER ELLSWORTH.

Olivan Ellaworth.

From Pennsylvania—William Machar and Robert Morns.

From Georgia—William Faw.

The members present not being a quorum they adjourned from day to day, until William Faw.

Wilder Machard Hard Machard Machada ath inst nt, it was agreed that a circular should waitten to the about members, requesting their immediate attendance.

On Thursday, the 19th of March, WILLIAM PATERSON, of New Jorsey, appeared and took his goat; RICHARD BASSETT, from Delaware, came in on the 21st; JONATHAN ELMER, from New Jersey, on the 28th; and RICHARS HENRY LEE, from Virginia, on the 6th of April; when a quorum being at length precent, an organization was effected, and the votes for President of the United States were opened and counted .---GEORGE WARRINGTON, who received all the votes cart, (sixty-nine,) was declared elected Provident, and Jour ADAMS, who received 34 votes, was declared elected Vice-President. The House of Representatives was organized on the 1st of

April, a few days before the Scoute. One of the carliest subjects of discussion between the two Houses was, as to the title under which it would be proper to address the President. The Senate proposed: "His Highness the President of the United States, and the Protector of their Liberties," The House was against any title. A Committee of Conference was appointed, which agreed upon the title "His Excellency." To this the House agreed, but the Senate dissented, and another Committee of Conference had to be appointed. The Twriff, Indian Treatics, and Executive appointments, occupied most of this session. The attempt to through disegracing votes of the two Houses, as mell, Dr. Woodward, Maj. Tomes, Maj. Jas. Fosto the details, though the site, "some convenient place on the banks of the Suzquebauna, in

the State of Ponnsylvania," was agreed upon.

The next, or second session of Cognress, was also held at the city of New York, commencing January 4, 1790, and ouding August 12th of the same year. Among the first subjects which engage I the attention of the Mouse was a memorial from the Ponnsylvania Society, for promoting the Abelition of Slavery. It was signed by the illustrious FRANKLIN and urged Congress "to discourage every species of traffic in the person of our fellow-nien." The memorial was respectfully received, discussed at some length, and referred to an appropriate committee by a vote of 48 to 14. Very different treatment from that ac gorded by modern "Democracy" to like memoriais. The important topics of the assumption of the State debts and the permanent location of facing the same with a very elequent parra the Seat of Government occupied the remainder of the session. Each was discussed at great longth and each, at first, failed ; but by a combination among leading friends of the two measarce, or "log-rolling," both finally passed. The bill to fix the permanent seat of Government on the banks of the Potemac, the present site, passed the House of Representatives, July 9th, by Year 31 to Nays 29, a mejority of two only.

The third session of the first Cougress, was hald in the city of Philadelphia, communing December 6th, 1790, and ending March 3d 1791. The most interesting question discussed. was the bill to incorporate the Bunk of the United States. It passed both Houses by large majoritles, though carnestly opposed at every stage.

The first session of the second Congress, was held at Philadelphis, from Oct. 24, 1791, to May 8, 1792; as was the second session, which extended from Nov. 5, 1792, to March 4, 1703. Among the interesting incidents of the latter was the result of the second election for Presidont of the United States. Ground Washington ros was again unanimously elected, receiving at the votes cast, 132; while Joun Adams, was reelected Vice President, receiving a plurality, 77 votes, to 50 for GEORGE CLINTON, 4 for THOMAS JEFFERSON, and 1 for Almon Burn. Among the bills pussed, without debate and almost without division, was the act of 1793, relative to "fugitives from justice and persons escaping from service." It was intended mainly to apply to the first class, as neither the "underground Railroad," nor the professional hunting of slaves. was at that time in fashion.

The first session of the Third Cougress was held at Philadelphia, begining December 2, 1793, and extending to June 9, 1794. But we have no roum for presont reference to its doings. Let us add that the first volume of the Debates ex- The three companies, drawn up in a line, protend to June 1, 1796, and that we know of no more valuable pullcation than this is to the American Legislator, the American Jutist, or the American Scholar. It is the complete political record of the country, and should be read and studied by every man who wishes thoroughly to understand the spirit of our Institutions. Copies may be obtained direct from the publishers, S. C. Grague & Co., 59 and 41 Lake street, Chicago or from their travelling agent for the State, Mr. R. B. The march thence to the City Hull was quite a triumph. The display was imposing, and the thousands of citizens who crowded the side wolks, kept up a rear of applause during the action may give the entire march.

The party left Camp Scott on the 18th of May, into his hands the "greet seal," and all State records. The Mormon chiefs appeared particularly solicitoes that Gov. Cumming should take possession of these momentous documents, relypossession of these momentum deciminal, reying upon this measure as the only one for their preservation. They were urgent that the Gov. should at once deposit them in a five proof safe. The reason of this soon transpired with the distance when the proof safe are proportions and the safe and the safe are transpired. The reason of this soon transpired which do dis-covery that extensive preparations had been skilfully made to give the city to the firmes, a ta the Russlans at Muscow. Large quantities of dried fence wood had been arranged to many houses which a match would have kindled to conflagration. Happily better councils prevailed among the leaders, and attenuous endeavors were successfully made by the major part of the

it was useless to pursue them. The forward trains were three hundred miles southward down the valley. The governor counted seven hundred and fifty wagons laden with families. They wore abundantly provisioned. Many hundreds had "butted" by the way; i.e., had built adoke houses of the road mud. The cold and heavy raius had disaspointed their expectations of the dry weather necessary to the permanency of such structures, and had washed away their walls. They were thus left exposed to the winds and rains. But there appeared no very serious suf-fering, though much and trying inconvenience. The sitempt to procure a general abandonment of the march was of course futile.

of the march was of course futile.

There is uncertainty about the destination which the Mormon leaders now propose to themselves. They keep their own counsel in this respect with remarkable closeness. The suggestion that they were bound for Cedar City la rather discredited by the fact that they have driven large herds of their cattle much south-ward of that point. It is feared that they may coalesce with some of the Indian tribes of the South, which are already sufficiently vexations, and thus give much trouble to the Government. elves complain bitterly of the treat ment of roving parties of Indians, who, finding them defenceless on the road cannot resist the temptation presented by so much booty. The Indians tidicule the Mormona, saying they are

Camp Scott remained healthy. The accounts of inadequate provisions have been exaggerated. The quality of their fare is alone matter of complaint with the troops. Gov. Cumming has ta-ken efficient steps to remedy all inconvenience, and preclude the possibility of suffering in the

MONEY MARKET.

Bankind and Exchange Office of Bridge Brothers,) No. 166 East Water St., Mil., June 19, '53.

There has been but little change in the money market for the last week, though considerable amounts are sent here for the purchase of grain. About the Brst of March

it was estimated that only one-third of the produce in the

country was forwarded. For pro. f of that statement, we

give the receipts for the past week, at from thirty to fifty

thousand bushels per day-the morning trains having

the is day delivered ever fifty thousand bushels.

The recent extensive rains, and consequent heavy

Boods, have been an immense damage to the country,

causing a loss of probably fifty millions of dullars. In

our own flate, overy water power has been injured, dams having been carried away, and millers suffering thereby

to an extent never before known. To offset the loss, how ever, we can speak of the fine appearance of the coming crops, and from the freedom with which the old harvest

is brought in, we have the right to suppose, that our farmers, in the fall, will seit their produce at offering rates

suppose that the next 30 days will show a shipment from here of one million bushels of wheat, and by the time the

fall grop presents itself, our dealers will be prepared to
